TEXAS DISPOSAL SYSTEMS TO PROVIDE ALL CITY OF HALLETTSVILLE WASTE SERVICES EFFECTIVE APRIL 2017

HALLETTSVILLE, Texas -- Texas Disposal Systems (TDS), a leading resource management company that helps customers manage and divert waste to beneficial uses, will be the exclusive provider for recycling and solid waste collection in the City of Hallettsville effective April 1, 2017.

TDS will pick up trash from residential carts every Thursday and pick up recycling from recycling carts every other Monday. TDS will provide carts for the residents of Hallettsville.

Weekly trash pickup is limited to those provided carts, plus one 30-gallon bag or bundle, which should be placed on the curb near the cart. Pick-ups for recycling are limited to residential carts only. Bulky item pick-ups and additional carts are both available at additional fees.

Recyclable materials need to be clean and free of debris such as food waste, dirt and liquids. Recyclables must not be bagged and should instead be placed loosely inside of the recycling bin. This method is imperative to process recycling materials and to keep Hallettsville's recycling program running in top condition.

Glass is not considered recyclable material in Hallettsville's recycling program. For further questions or concerns about the recycling program offered in Hallettsville, residents can call the Hallettsville Residential Customer Care line at 512-930-1715.

The partnership between TDS and the city of Hallettsville is the beginning of a five-year contract, approved by Hallettsville city council members in February. In addition to Hallettsville, TDS provides a wide range of services with a holistic approach in several cities, including Austin, San Antonio, Kyle, Buda, Weimar, San Marcos and more.

Since 1977, Texas Disposal Systems has been proud to be doing business in a noticeably different, noticeably better way. TDS is committed to environmental preservation and utilizes only the most environmentally conscientious methods for solid waste collection, processing and disposal. As a family-owned and independent company, TDS sets new standards in the resource management industry by offering a revolutionary approach to resource recovery, focused on integrated technology and quality service.

ABOUT TDS:

Texas Disposal Systems is one of the largest independently-owned solid waste collection, processing and disposal companies in the nation. Our fully integrated facility incorporates solid waste disposal, compost production and recycling operations. We provide the highest quality and most environmentally friendly services in the best interests of our customers, employees and the community.
